Do you have any doctors working with your sporting teams or who have expressed an interest in working with any of your teams?

The SA Sports Medicine Association (SASMA) developed the ***Sports Medicine in General Practice Course*** in the 1990s to assist with training doctors working with sporting teams and active people.

We understand that often as State Sporting Organisations you require doctors but are unsure of the level of training they may need to have to work with your sport. This Course is a great starting point for any doctor looking to work with your sport and / or to increase their knowledge in sports injuries and medical matters that relate to athletes and active participants.

Over the years, leading SA based Sports Medicine Experts like Dr Brian Sando, Dr Andrew Potter and now Dr Marc Cesana have been the Course Coordinators. It has also been the starting place for many of the doctors who currently work with our professional, state and national teams.

In 2020, doctors will be able to choose to attend the course either online via Zoom or Face to Face (only a limited number of face to face places will be available).

The Course will be held from **Thursday 10th September to Sunday 13th September 2020**, with the Face to Face component to be held in Adelaide at the Playford Hotel, North Terrace, Adelaide.

This course is held only once a year and is recommended they register early to guarantee their place.

For more details including the full program and to register go to: https://bit.ly/2ZDJxrZ

Could you please pass this on to your Medical Teams and networks. We would like to make sure that SA Sports have first priority of getting their doctors into this course before we open it up nationally and internationally.

We look forward to seeing your doctors at this course in 2020.

Regards,

Daniel
